About Me

Computer Science graduate focused on data and software engineering. Experienced in designing relational databases, building end-to-end data pipelines, and shipping real-time web applications. Skilled at turning raw data into clean, reliable datasets and interactive tools that support analysis and decision-making.

Education

Bachelor's, Computer Science  09/2022 – 06/2026
Umm Al Qura University Makkah, Saudi Arabia

Professional Experience

Data Governance Intern (CO-OP), Master Works  03/2025 – 07/2025
Riyadh, Saudi Arabia

- Built a centralized data catalog and business glossaries in Informatica CDGC as part of a company-wide data governance initiative.
- Ran metadata scanning and data classification across sensitive assets, enforced privacy policies, and assigned data stewardship roles.
- Improved data quality and discoverability to support downstream analytics and reporting.

Tech Stack: Informatica CDGC, SQL, Python, ETL, Data Warehousing, Power BI.

Projects

Übār – Real-Time Multiplayer Web Game  10/2025 – 06/2026

- Developed a real-time multiplayer single-page application using vanilla JavaScript and Firebase Realtime Database, engineering concurrency-safe rooms with presence tracking, automatic host re-election, and validating usability with 54 participants.

Tech Stack: JavaScript (ES Modules), Firebase Realtime Database, Node.js.

Spam Detection System – NLP & ML Pipeline  10/2025 – 12/2025

- Engineered an end-to-end SMS spam classifier pipeline comparing Naive Bayes and SVM models, achieving 97% accuracy, 98% precision, and 92% F1-score and deploying the highest-performing model into an interactive Streamlit application with confidence scoring.

Tech Stack: Python, scikit-learn, NLTK, Pandas, Streamlit.

Hospital Database Management System  09/2023 – 11/2023

- Designed a normalized relational MySQL database with a comprehensive ERD for hospital operations, and developed complex analytical SQL queries utilizing joins, aggregations, and enforced key constraints.

Tech Stack: MySQL, SQL, Database Design, ERD.

Video Game Sales Prediction – Data Analysis & Regression  12/2024 – 01/2025

- Cleaned data and trained a linear regression model to predict global video game sales, evaluating performance via MSE and R^2 , and built an interactive Streamlit dashboard using Plotly to visualize genre and publisher trends.

Tech Stack: Python, Pandas, scikit-learn, Plotly, Streamlit.

Skills

Programming Languages Python, SQL, JavaScript, PHP	Analysis & BI Pandas, NumPy, scikit-learn, Power BI, Plotly, Streamlit
Databases & Data Engineering MySQL, Firebase Realtime Database, ETL, Data Cleaning, Data Warehousing, Data Governance (Informatica CDGC)	Software Engineering Vanilla JS (ES Modules), SPA Architecture, Git & GitHub, Agile/Scrum
Soft Skills Problem Solving, Communication, Teamwork, Time Management	Languages Arabic, English
