ABOUT ME

As a Computer Science graduate with a strong passion for data and Artificial Intelligence, I have hands-on experience in data engineering, building robust data pipelines that transform and prepare data for AI and analytical models. I specialize in ensuring data quality and reliability, enabling accurate insights and scalable AI solutions. I am excited to apply my skills in a dynamic environment, bridging the gap between data infrastructure and intelligent decision-making.

EDUCATION

Umm Al Qura University
Bachelor's Computer Science

September 2022 - June 2026
Makkah

EXPERIENCE

CO-OP IT Intern, Master Works,at Riyadh Airports Project- [Certificat](#)

March - July 2025
Riyadh

I contributed to a company-wide data governance and management initiative using Informatica CDGC. I played a key role in designing a centralized data catalog, creating business glossaries, and enforcing privacy policies on sensitive data. I conducted metadata scanning, classified data, and assigned stewardship roles, ensuring data quality and accessibility. This experience sharpened my abilities in building scalable data pipelines and integrating governance frameworks to support AI and data-driven decision-making.

Tech Stack: Python, SQL, Informatica CDGC, data warehousing solutions, cloud platforms, ETL tools, and data visualization tools.

PROJECTS

- **Ūbār: Interactive Arabic Multiplayer Web Game | Graduation Project |** 09/2025 – 06/2026
Co-developed **Ūbār**, a competitive, multiplayer party web game inspired by Saudi culture and history (AlUla & Ubar lore), designed to enhance Arabic lexical skills through engaging real-time linguistic challenges. Implemented responsive game logic, room management, and dynamic user interfaces, validating system usability via SUS metrics with over 54 active participants.
Tech Stack: JavaScript, Firebase Realtime Database.
- **SmartSaver: Personal Finance Management Syste** 02/2025 – 05/202
Developed a secure personal finance platform to automate budget tracking. Engineered the back-end and database models for user authentication, monthly salary entry, and categorical expense logging. Programmed system logic to calculate savings percentages, track real-time spending, and display financial metrics on a live dashboard.
Tech Stack: PHP, MySQL, HTML, CSS, JavaScript, Agile/Scrum, GitHub.
- **Aljamoum University Campus Network Design** 10/2024 – 01/2025
Designed a scalable star network infrastructure for the university's male and female campuses. Configured routers, switches, and access points segmented into VLANs to secure wired and wireless connections across departments. Conducted price estimations and systematic ping testing to optimize network routing and data accessibility.
Tech Stack: Cisco Packet Tracer, Routing & Switching, DHCP, Static Routing.
- **Mullti-Model Senliment Analysis Framework-NLP** 08/2024 – 10/2024
Developed an NLP pipeline to classify sentiment using pretrained models (BERT, RoBERTa, DistilBERT).Built a data normalization layer to unify diverse model outputs into a consistent format for evaluation.Conducted a comparative performance analysis using Accuracy, Precision, Recall, and F1-score.Implemented a real-time Streamlit application to display predictions and confidence scores for user-input sentences.
Tech Stack: Python, Hugging Face (Transformers), Scikit-learn, Pandas, Streamlit.
- **Interactive Recipe Sharing Platform** 09/2024 – 12/2024
Architected the system design and technical documentation for a community-driven cooking platform. Created comprehensive UML models, Finite State Machines, and Sequence Diagrams to map core system components. Modeled operational workflows for user authentication, content creation, interactive ratings, and admin moderation.
Tech Stack: Software Documentation, UML Modeling, Use Case Analysis, Finite State Machines, Sequence Diagrams.

SKILLS

Technical skills

Data Pipelines, ETL, Data Cleaning, Data Governance, SQL, Python, Power BI, Machine Learning

Soft skills

Problem Solving, Communication, Time Management,Teamwork

LANGUAGES

Arabic

English
